Identifying and Prioritizing Risks, Customized to Your Goals

Severity and impact of cyber attacks is at an all time high. In response, regulatory and other stakeholders are now requiring much greater visibility into potential risks and protective controls. Understanding cyber risks for your institution has never been more important.

Aon / Stroz Friedberg specializes in cyber risk identification. Because one size does not fit all, we have a broad range of capabilities to help you quickly identify and solve potential exposures. Our experts will work with you to build the program you need to protect your investments.

The Aon / Stroz Friedberg Difference:

- Custom risk identification solutions designed by in house experts to meet your goals
- Independent, industry-standard based validation of critical security controls
- Comprehensive picture your cyber maturity, including strengths, mitigating controls, and improvement areas
- Prioritized risk roadmap based on severity and impact
- Powerful data analytics to aggregate common risks and enable cost-effective solutions
