## Commercial/Multifamily Mortgage Delinquencies

*Commercial Mortgage Delinquency Rates Increased in the Second Quarter of 2024*  
Second Quarter 2024

---

Commercial mortgage delinquencies increased in the second quarter of 2024, according to the Mortgage Bankers Association's (MBA) latest Commercial Delinquency Report.

"The delinquency rate for loans backed by commercial real estate increased again in the second quarter," said Jamie Woodwell, MBA's Head of Commercial Real Estate Research. "Delinquency rates increased for bank loans and Freddie Mac loans, as well as those held in CMBS. Delinquency rates decreased for loans held by life companies and were unchanged for Fannie Mae."

Woodwell continued, "The greatest focus continues to be on office loans, which make up about \$740 billion of the \$4.7 trillion of commercial mortgage debt outstanding. The CRE market is large and diverse, with significant differences by property type and subtype, market and submarket, borrower, lender, vintage, and more. All of those differences come into play in terms of how an individual loan may perform."

MBA's quarterly analysis looks at commercial delinquency rates for five of the largest investor-groups: commercial banks and thrifts, commercial mortgage-backed securities (CMBS), life insurance companies, and Fannie Mae and Freddie Mac. Together, these groups hold more than 80 percent of commercial mortgage debt outstanding. MBA's analysis incorporates the measures used by each individual investor group to track the performance of their loans. Because each investor group tracks delinquencies in its own way, delinquency rates are not comparable from one group to another. As an example, Fannie Mae reports loans receiving payment forbearance as delinquent, while Freddie Mac excludes those loans if the borrower is in compliance with the forbearance agreement.

Based on the unpaid principal balance (UPB) of loans, delinquency rates for each group at the end of the second quarter of 2024 were as follows:

- Banks and thrifts (90 or more days delinquent or in non-accrual): 1.15 percent, an increase of 0.12 percentage points from the first quarter of 2024;
- Life company portfolios (60 or more days delinquent): 0.43 percent, a decrease of 0.09 percentage points from the first quarter of 2024;
- Fannie Mae (60 or more days delinquent): 0.44 percent, unchanged from the first quarter of 2024;
- Freddie Mac (60 or more days delinquent): 0.38 percent, an increase of 0.04 percentage points from the first quarter of 2024; and
- CMBS (30 or more days delinquent or in REO): 4.82 percent, an increase of 0.47 percentage points from the first quarter of 2024.

Construction and development loans are generally not included in the numbers presented in this report but are included in many regulatory definitions of 'commercial real estate' despite the fact they are often backed by single-family residential development projects rather than by office buildings, apartment buildings, shopping centers, or other income-producing properties. The FDIC delinquency rates for bank and thrift held mortgages reported here do include loans backed by owner-occupied commercial properties. Differences between the delinquencies measures are detailed in Appendix A.

Note: Differences between the delinquency measures are detailed in Appendix A.

## APPENDIX A SOURCES & MEASURES OF DELINQUENCIES

### *Commercial Mortgage-backed Securities (CMBS)*

Source: Trepp LLC.

The delinquency rate for CMBS loans covers loans 30+ days delinquent, including those in foreclosure, and real estate owned (REO). The CMBS rate is the only one to include REO in either the numerator or the denominator.

### *Life Companies*

Source: American Council of Life Insurers

The delinquency rate for life insurance company loans covers loans 60+ days delinquent, including those in foreclosure, and does not include real estate owned (REO) in either the numerator or the denominator.

### *Fannie Mae*

Source: Fannie Mae Monthly Volume Summary and Office of Federal Housing Enterprise Oversight Annual Reports to Congress the delinquency rate for multifamily loans either held in portfolio or securitized and guaranteed by the company covers loans 60+ days delinquent, including those in foreclosure, and does not include real estate owned (REO) in either the numerator or the denominator. The company was unable to provide December delinquency figures for the years 2000 to 2004, so the fourth quarter numbers presented for those years are November, rather December, figures. In January 2011, Fannie Mae revised its 2010 monthly multifamily delinquency rates for all periods presented to exclude multifamily borrowers who have entered into a forbearance agreement and are abiding by the terms of the agreement, but had been previously included in the multifamily delinquency rates due to an error.

### *Freddie Mac*

Source: Freddie Mac Monthly Volume Summary and Office of Federal Housing Enterprise Oversight Annual Reports to Congress

The delinquency rate for multifamily loans either held in portfolio or securitized and guaranteed by the company covers loans 60+ days delinquent, including those in foreclosure, and does not include real estate owned (REO) in either the numerator or the denominator.

Freddie Mac notes that their delinquency rate “[e]xcludes mortgage loans whose original contractual terms have been modified under an agreement with the borrower as long as the borrower complies with the modified contractual terms.” As an example, after Hurricane Katrina, Freddie Mac modified a number of loans affected by the storms. In May 2010, Freddie Mac returned to reporting multifamily delinquencies as those loans 60+ days delinquent.

### *FDIC-insured Banks & Thrifts*

Source: Federal Deposit Insurance Corporation

The delinquency rate for FDIC banks and thrifts covers loans 90+ days delinquent, including those in foreclosure and in non-accrual status, and does not include real estate owned (REO) in either the numerator or the denominator. The universe of loans covered by this series also includes a large number of “owner-occupied” commercial loans – loans supported by the income of the resident business rather than by rent and lease payments. In a 2007 analysis by MBA of the ten banks with the largest commercial mortgage portfolios, approximately half, in dollar volume, of their commercial (non-multifamily) loan portfolio was comprised of these “owner-occupied” properties.

Data are available for life companies, FDIC-insured banks and thrifts, Fannie Mae and Freddie Mac since 1990 and CMBS since 1997.
